roobarb.net/EPOS

- RETAIL SALES
- BARS & RESTAURANT
- REPAIR CENTRES
- WHOLESALE
- HAIR & BEAUTY
- MOTOR FACTORS. ETC.

Our EPOS System is so flexible it can be tailored to most retail (and wholesale) environments.

Although the example here shows a typical pub/wine bar layout we have many examples and can even design a layout specifically for your needs. The flexibility does not end with software we have several fixed and hand held bar code scanners, several cash drawers, receipt printers, kitchen and waiter distribution printers, wall mounted screens, report printers, back office and head office servers, customer display panels, and if touch screen is not enough we can also supply specialist keyboards. Virtually anything is possible. Please ask.

Why roobarb.net ?

We are experienced PC hardware & software engineers with years of experience looking after IT networks. We believe that unlike most companies in this industry we are engineers that sell and install, not salesmen, this enables us to give unrivalled post sales support. We are realists - one day something will go wrong and we need to be able to respond and fix your problem quickly. We offer a support package to suit your budget; from 'hot-swappable' spare units to remote & telephone support.

Call roobarb.net now for a no obligation chat or a free demonstration. See how our EPOS system can work for you!
