- ✓ Works in colour in lower light
- ✓ Vari-Focal 4-9mm Lens
- ✓ Superb Colour Reproduction
- ✓ Vandal Resistant Dome

Description

Working in extremely low light conditions the NiteDevil produces exceptional results where other CCTV cameras wouldn't see a thing!

The popular Nite Devil electronics were originally developed for bars and nightclubs, as the light sensitivity of the NiteDevil is so good that it can retain a colour picture in very low light conditions.

With such stunning low light performance and the ability to capture colour images in low light situations, the NiteDevil is a great choice not only for nightclubs and bars but for any poorly illuminated external areas such as compounds, car parks and wasteland.

This version comes complete with a wall bracket.
